(54) Title: A GAME

(57) Abstract: Apparatus for playing a game includes question cards (36) having questions (37) which are separated into levels of difficulty, a playing area (4) which is separated into geometrically shaped pathways (18, 20, 22, 24, 26) of consecutive playing spaces (8) corresponding to the levels of difficulty of the questions (37), playing pieces (48) for occupying the playing spaces (8) in the pathways (18, 20, 22, 24, 26), and at least one random number indicator (50) for determining movement of the playing pieces (48) around the pathways. The pathways (18, 20, 22, 24, 26) have different numbers and sequences of the playing spaces (8) corresponding to particular levels of difficulty of the questions (37) whereby the pathways determine different levels of difficulty of the game.
